

Ismail Fabrics
Manufacturer & Exporters of Quality Fabrics & Made-Ups

A close-up photograph of two cotton bolls on a brown branch, set against a background of soft, out-of-focus white cotton fibers. The bolls are white and fluffy, with some brown, dried leaves still attached to the branch.

OUR JOURNEY

It all started in 2002 when Ismail Fabrics was setup in the textile hub of Pakistan, the city of Faisalabad. Our main aim was to provide innovative textile solutions across the globe with our well-organized manufacturing unit, Ismail Fabrics is an export-oriented textile manufacturing company. With our efficient unit and professional team, we are serving the textile procurement needs of textile importers worldwide. Our in-house weaving and stitching enable us to produce value added articles such as all sorts of fabrics, made ups with different weaves and constructions such as dobby, twills, satins, percales and yarn dyed articles on buyer's request. In made-ups section, we can manufacture a wide range of variety in home textiles, health care textiles and hospitality textiles.

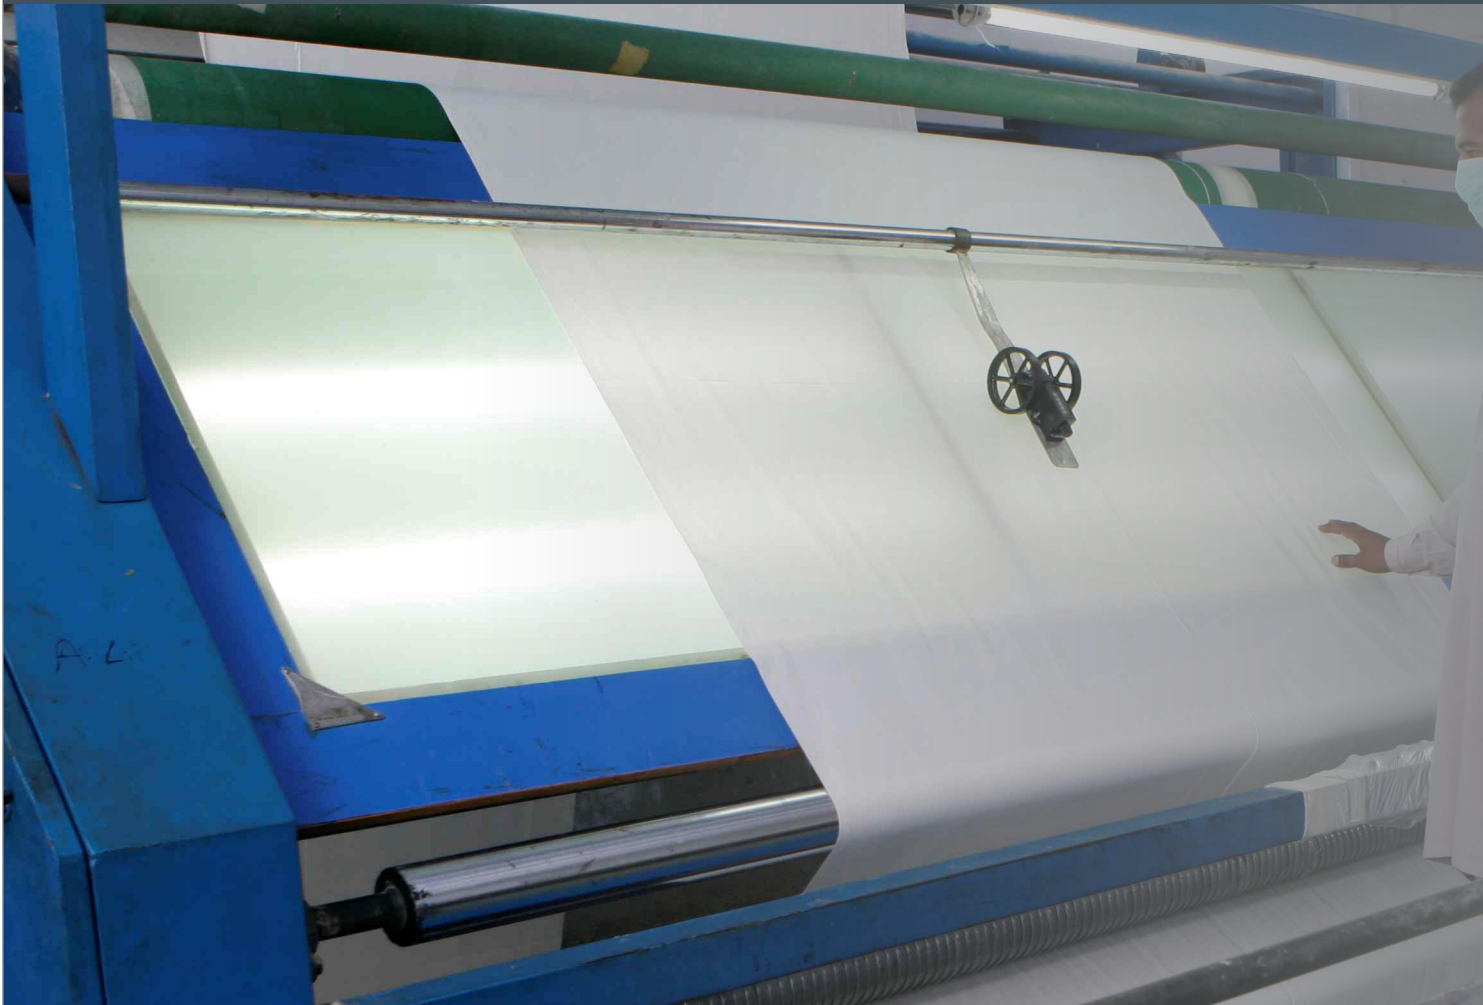

OUR SYSTEMS & QUALITY COMMITMENT

We value our commitments to customers highly and therefore continually strive to improve our systems and quality to meet expectations. Our trained team has a daily follow up meeting on all production styles to keep things on track and customers informed.

PROCESSES PLANNING, DEVELOPMENTS, SAMPLING & MONITORING

Merchandising and production planning of new developments and enquiries is actioned on a prompt basis. A dedicated full time sampling team with pattern development, cutting and stitching facilities is at our disposal. Required inputs are discussed and planned in a manner which ensures a continuous production flow. Our trained team has a daily follow up meeting on all production styles to keep things on track and customers informed.

WEAVING

Weaving facility being the back bone of every textile manufacturing company, Ismail Fabrics has its own weaving unit. Other than Sulzer, we have a large network of reliable Air Jet weaving units whom we are working since 2008. Some of our articles like Satins, Twills, Half Panama, Ducks and some other value-added items are produced on Air jet looms.

FABRIC PROCESSING

We can process our products on the rmosol dyeing, continuous bleaching plant, Flat Bed, Rotary Print and Pad steam range from Germany and South Korea, which are capable of annual production of 28 million meters on international standards. Our excellent dyestuffs, shade variance and colour batch preparation assure that our products sustain the premier quality of international standards. Due to significant concern towards quality and environment, we are certified with OEKO TEX100.

STITCHING

Our specialized cut to pack set up can produce up to 30,000 pieces a month for basic styles with 20,000 piece capacity for more complex made-ups. Machines are constantly being updated with modern fully automated models that increase productivity for a skilled mix of workers and supervisors. Finishing setup includes trimming, pressing, labelling and packing staff.

QUALITY CHECKING & PACKING

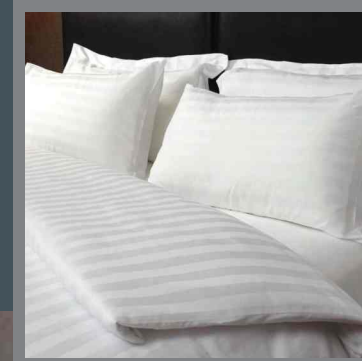

Our highly experienced and professional inspection team makes frequent quality checks at different production stages. Similarly, before packing is started, keen quality checks are done to make sure that the standards have been met to maximise customer satisfaction.

After this, packing starts and we deliver the products in any fascinating style of packing as per customer's requirements. Either its rolling artefact or created ups for industrial / retail market. guaranteeing the standard of merchandise with engaging presentation and simple identification, equipped with latest Balling Press, Rolling Machine and Crease & Lapped machines.
